County Officials Salary Schedule

FY 2017-2018

TO: County Officials

FROM: Robin Roberts, Executive Director

DATE: January 18, 2016

SUBJECT: County Officials' Compensation FY 2017-2018

COUNTY OFFICIALS. Compensation for most county officials is governed by T.C.A. § 8-24-102, which establishes the minimum compensation for assessors of property, county clerks, clerks of court, trustees, registers of deeds, county mayors, sheriffs, and highway officials. This law provides for an automatic increase in the minimum salary each year based on the percentage increase given to state employees for the previous fiscal year. It requires the commissioner of finance and administration to certify to the comptroller of the treasury the average annualized increase in state employees' compensation on or before May 1 of each year. The commissioner certified on October 6, 2016, that state employees received an average increase of 6.38 percent for the fiscal year 2017-2018.

The certification provision and other requirements are contained in T.C.A. § 8-24-102(d) as follows:

On July 1, 2002, and each July thereafter, the minimum compensation for county officials, as provided by this section, shall be increased by a dollar amount equal to the average annualized general increase in state employees' compensation, including the equivalent percentage increase in average state employees' salaries represented by appropriated funds made available to address classification compensation issues, during the prior fiscal year multiplied by the compensation established herein for the county officials of the county with the median population of all counties; provided, however, that the annualized general increase tied to the increase in state employees' compensation shall not exceed five percent (5%) in any given year. Provided further, notwithstanding the dollar amount provided herein, the percentage increase provided for county officials by this subsection shall not be less than the percentage increase established for county officials of the county with the median population of all counties. On or before May 1 of each year, the commissioner of finance and administration shall certify to the comptroller of the treasury the average annualized general increase in state employee's compensation during that fiscal year. "Average annualized general increase in state employee's compensation" means the average percentage increase in base salaries for state employees, plus the equivalent percentage increase in average state employees' salaries represented by recurring appropriation amounts provided to improve the level of retirement benefits, longevity benefits, and deferred compensation benefits or other similar benefits that are made available to state employees, not including health insurance benefits.

The tables on the following pages contain our calculations of the minimum salary for each official, according to the statutory population classes, for the 2017-2018 fiscal year. Note that all salaries do not increase by 5.0 percent. Instead, in accordance with the statute as amended,

the minimum salaries of officials in those counties with populations equal to or above the county with the median population will increase by 5.0 percent. The increase for those counties below the county with the median population is a dollar amount that is equal to the dollar amount of the increase in the minimum salary in the county with the median population. The county with the median population as of the 2010 census is Obion County with a population of 31,807 which is within the 23,000 to 34,999 range.

Other requirements regarding salaries are as follows:

ADMINISTRATORS OF ELECTIONS. Separate legislation (T.C.A. § 2-12-208) provides for minimum salaries for the administrators of elections. These salaries are based upon percentages of the assessor's compensation. As with the statute discussed above, this law provides for yearly salary increases based upon increases for state employees during the prior fiscal year and calculated in the same manner.

GENERAL SESSIONS COURT JUDGES. Salaries of general sessions court judges are to be increased annually in the same manner as state court judges, which is the actual percentage change in the consumer price index between the previous two calendar years (T.C.A. §§ 16-15-5003 and 8-23-103). The CPI change between the 2015 and 2016 is 1.3 percent. Therefore, the salary of the general sessions court judges will increase by 1.3 percent beginning July 1 for the coming fiscal year. Notwithstanding any other law to the contrary, a general sessions court judge's salary may not exceed that of a circuit court judge. *CTAS does not prepare salary schedules for general sessions court judges because the salaries in each county are based on the private acts and general laws that apply in each particular county and on salary calculations made by the Administrative Office of the Courts pursuant to T.C.A. § 16-15-5003(i)(7).*
